Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-43 and 101-144, drawn to a process for coating comestibles.

Group II, claim(s) 44-50 and 145-151, drawn to a coated product.

Group III, claim(s)s 51-73 and 152-174, drawn to an apparatus for coating comestibles.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Process claims 22, 27 and 34 as well as product claim 44 does not contribute over the prior art to Gum Technology, as cited in the international search report of this application (WO 02/19834). Also the apparatus does not contribute over the prior art to Pentcost (US 2002/0117108).

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved

throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 74-174 been renumbered 101-174.

Claims 74-100 are not present in the application.

Applicant is advised that 371 documents submitted with the application are related to a different invention and are from a different inventor than the inventor of this application. The submission of the correct International Application would correct the record.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed

errors in the restriction requirement, the election shall be treated as an election without traverse.
